Plum brandy Anton Kaapl 47% This first-class brandy is produced by multiple distillation from mature kvass prepared from high-quality, sweet, and ripe plums from a fruit grower in the Lublin region of Poland. All plums are pitted before loading. Brandy received a bronze medal from Austrian sommeliers in March 2019 at a competition in Wieselburg.

Pear brandy Jacopo Poli Aromatic, fruity brandy from the Jacopo Poli distillery. The basic raw material used for production are 100% Williams pears from South Tyrol. Brandy is produced in September, when the pears reach their peak ripeness. The pears are first fermented in stainless steel tanks, followed by distillation and 6 months aging again in stainless steel tanks. The resulting schnapps has an intense and pure aroma, typical of the Williams variety. The taste is delicately smooth, complex, with a longer finish.

Pear brandy Anton Kaapl Williams 47% Thanks to the noble special fermentation process and careful distillation by the master distiller, the typical, soft, fully intense tones of the Williams pear are transferred to the schnapps. Williams has a strong onset and is characterized by a very, very long aftertaste.

Rum Dos Maderas Premium blend of Caribbean rums. Ripening is divided into three stages. The first 5 years are aged in oak barrels directly in the Caribbean. It is then transported to Spain, where it matures in the cellars of the Williams & Humbert winery. First 3 years in Dos Cortados dry sherry casks and finally 2 years in sweet Don Guido sherry casks from the Pedro Ximénez variety. Dos Maderas 5+5 has a harmonious aroma with a touch of raisins and figs. The taste is very delicate, complex, and warm.

Tatratea 52% liqueur is the flagship of the entire range. It is a tea-herbal liqueur made on a natural basis. It is made up of a balanced ratio of the finest alcohol, natural extract from alpine herbs, first-class black tea, fruit extracts and Tatra spring water. It has a sweet taste of candied sugar and tea, supported by aromas of fresh raspberries, Assam tea and forest plants.
